Training , Learning and Development

AACSB ACCREDITED

Session Objectives

- Understand the importance and nuances of Onboarding Process
- Gather differences between Learning, Training and Development
- Understand the training and development design process
- Comprehend the significance of evaluation of training and development initiatives

Orienting and Onboarding New Employees

- Employee orientation
  - or **onboarding**
  - a procedure for providing new employees with basic background information about the firm
- Every manager should know how to orient and train employees
- The purpose of Orientation includes
  - Welcoming
  - Sharing basic information
  - Building an understanding of the organization
  - Initiating Socialization

Orienting and Onboarding New Employees

Socialisation tactic	Action	Polar tactic	Action
Collective	Grouping newcomers and putting them through common experiences	Individual	Handling each newcomer individually
Formal	Formal process of specific training	Informal	Informal process of integrating newcomers with existing staff
Sequential	Specific phases of induction	Random	More random approach
Fixed	Fixed timetable of achievement	Variable	No fixed timetable, variable approach
Serial	Newcomer is socialised by an experienced staff member	Disjunctive	No role model is used
Investiture	Uses feedback to affirm the identity and characteristics of the newcomer	Divestiture	No feedback on newcomer's personal attributes

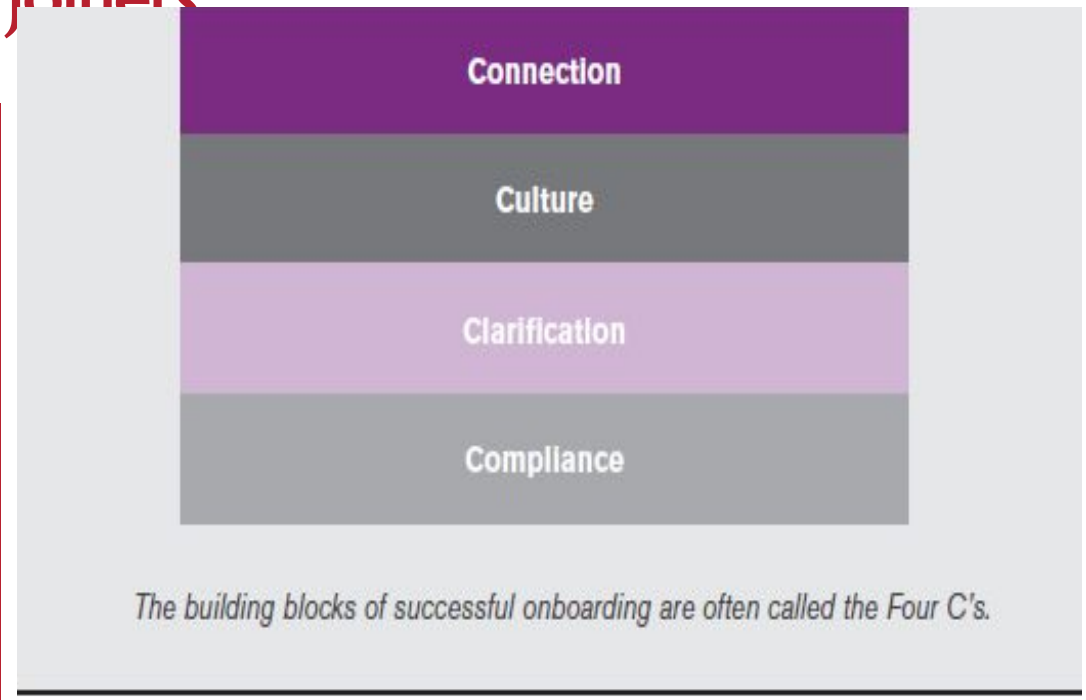
Orientation of new joiners



Onboarding New Employees: Maximizing Success
SHRM article by T N Bauer

Compliance is the lowest level and includes teaching employees basic legal and policy-related rules and
regulations.

- Clarification refers to ensuring that employees understand their new jobs & all related expectations.
- Culture is a broad category that includes providing employees with
a sense of organizational norms— both formal and informal.
- Connection refers to the vital interpersonal relationships and information networks that new employees must establish.

Orientation of new joiners

Onboarding Strategy Level	Compliance	Clarification	Culture	Connection
1 Passive	YES	SOME	LITTLE/ NONE	LITTLE/ NONE
2 High Potential	YES	YES	SOME	SOME
3 Proactive	YES	YES	YES	YES

Learning , Training and Development

Training

- Event based
- Group
- Perform job satisfactorily
- Improves performance of current job

Learning

- Continuous flow
- Individual/ Groups
- Upgrades individual skill, knowledge and ability
- Individual change in behavior and cognition

Development

- Evolving process
- Individual/ Groups
- Movement from a current state of knowledge to a higher state of knowledge

Define Training

Training is the use of planned instruction activities to promote learning. It involves the use of formal processes to impart knowledge and help people to acquire the skills necessary for them to perform their jobs satisfactorily.

Training is a systematic development of knowledge , skills and attitudes required by an individual to perform adequately a given task or job – Michael Armstrong

Purpose of Training

- Meet market demands
- Improvement in competency and performance
- Prevent obsolescence
- Build pipeline of leaders and technical experts
- Support functional excellence and efficient working of the departments.
- Increase productivity
- Balance quality with economical inputs

L&D Strategy

Business strategy
- What are our key business priorities?

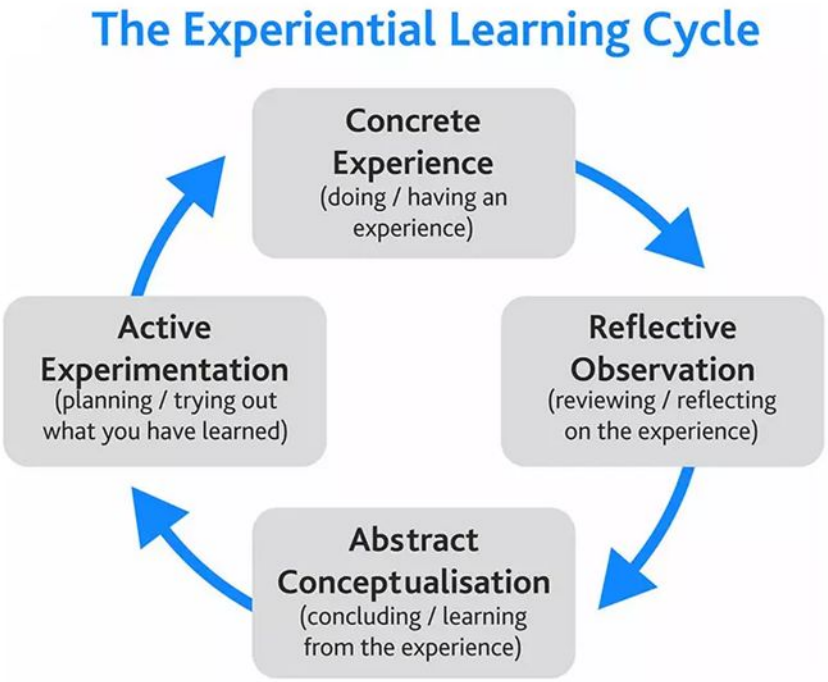
L&D strategy
- What learning/competencies would help us achieve these priorities?

Activities to facilitate
- What activities would lead to this learning?

Learning function
- What kind of learning function do we need to carry out these activities?

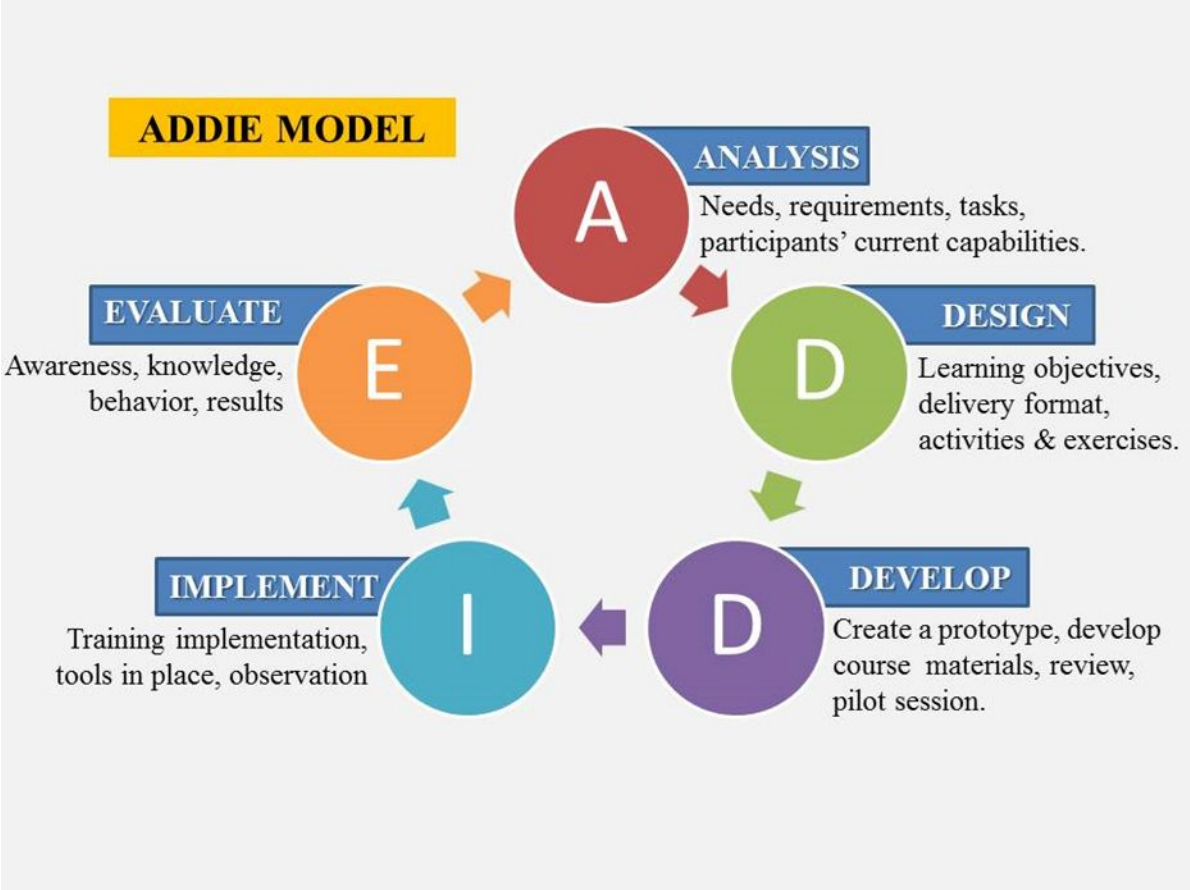
Learning Theories

- Andragogy – Action learning, Experiential learning, Project-based learning, Self-directed learning
- Bloom's taxonomy – Psychometric domain, Affective domain, Cognitive domain
- Social learning theory
- Learning Cycles

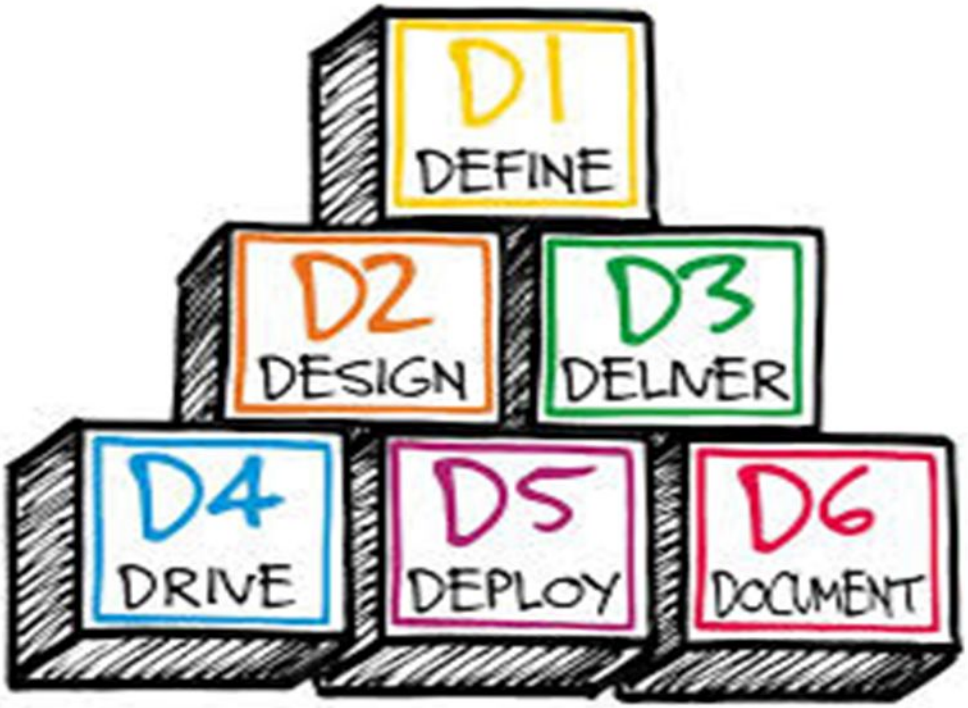


Training Design – 5 step ADDIE model

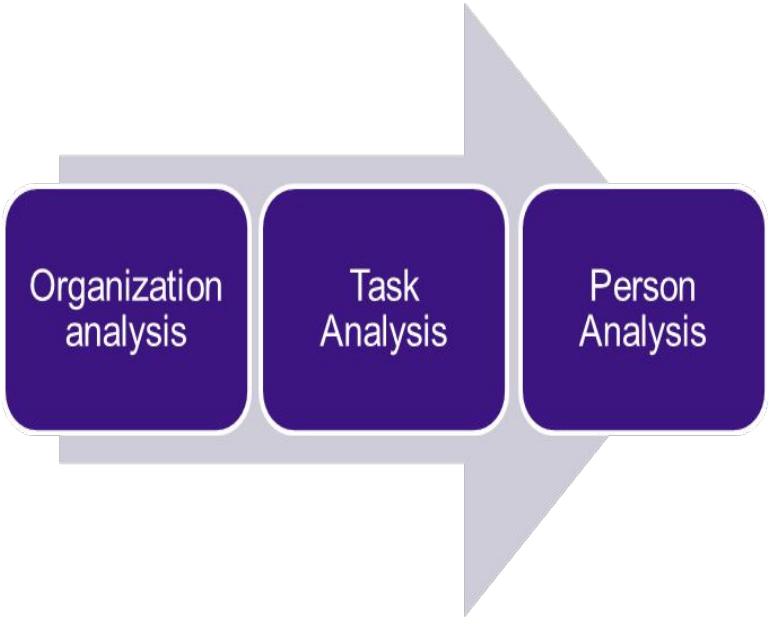
- Analyze
- Design
- Develop
- Implement
- Evaluate



Training Design – 6D model



Training Need Analysis



The TNA can help you:

- Improve the quality of your products or services
- Increase customer satisfaction and loyalty
- Reduce costs and errors
- Enhance employee engagement and retention
- Boost innovation and creativity
- Gain a competitive edge

Training Need Analysis

The Company: ABC Inc.

ABC Inc. is a small manufacturing company that produces custom-made furniture for residential and commercial clients. The company has been in business for over 20 years and has a loyal customer base. However, in recent years, the company has faced several challenges:

- The demand for custom-made furniture has declined due to the economic downturn and the rise of online retailers that offer cheaper and faster alternatives.
- The company has lost some of its key clients to competitors that offer more innovative and diverse products.
- The company has experienced high employee turnover, especially among its skilled workers, due to low wages, poor working conditions and lack of career development opportunities.
- The company has suffered from quality issues, delays and customer complaints due to outdated equipment, inefficient processes and inadequate training.

The company's owner, Mr. Smith, realized that he needed to take action to save his business. He decided to conduct a TNA to identify the training needs of his employees and design training interventions to improve their performance.

Training Need Analysis

Define the objectives: Mr. Smith defined the objectives of the TNA as follows:
- To identify the current and desired performance levels of his employees in terms of knowledge, skills and attitudes
- To identify the gaps between the current and desired performance levels
- To prioritize the training needs based on their impact on the business goals
- To recommend training interventions to address the training needs

Collect data: Mr. Smith collected data from various sources to assess the current and desired performance levels of his employees. He used:
- Interviews with key stakeholders such as customers, suppliers, managers and employees
- Surveys and questionnaires to gather feedback from employees and customers
- Observation of work processes and employee behaviors
- Review of documents such as sales reports, quality records, customer complaints and performance appraisals

Training Need Analysis

Analyze data: Mr. Smith analyzed the data using various methods such as:
- SWOT analysis to identify the strengths, weaknesses, opportunities and threats of his company
- Gap analysis to identify the differences between the current and desired performance levels of his employees
- Root cause analysis to identify the underlying reasons for the performance gaps
- Cost-benefit analysis to estimate the potential return on investment (ROI) of training interventions.

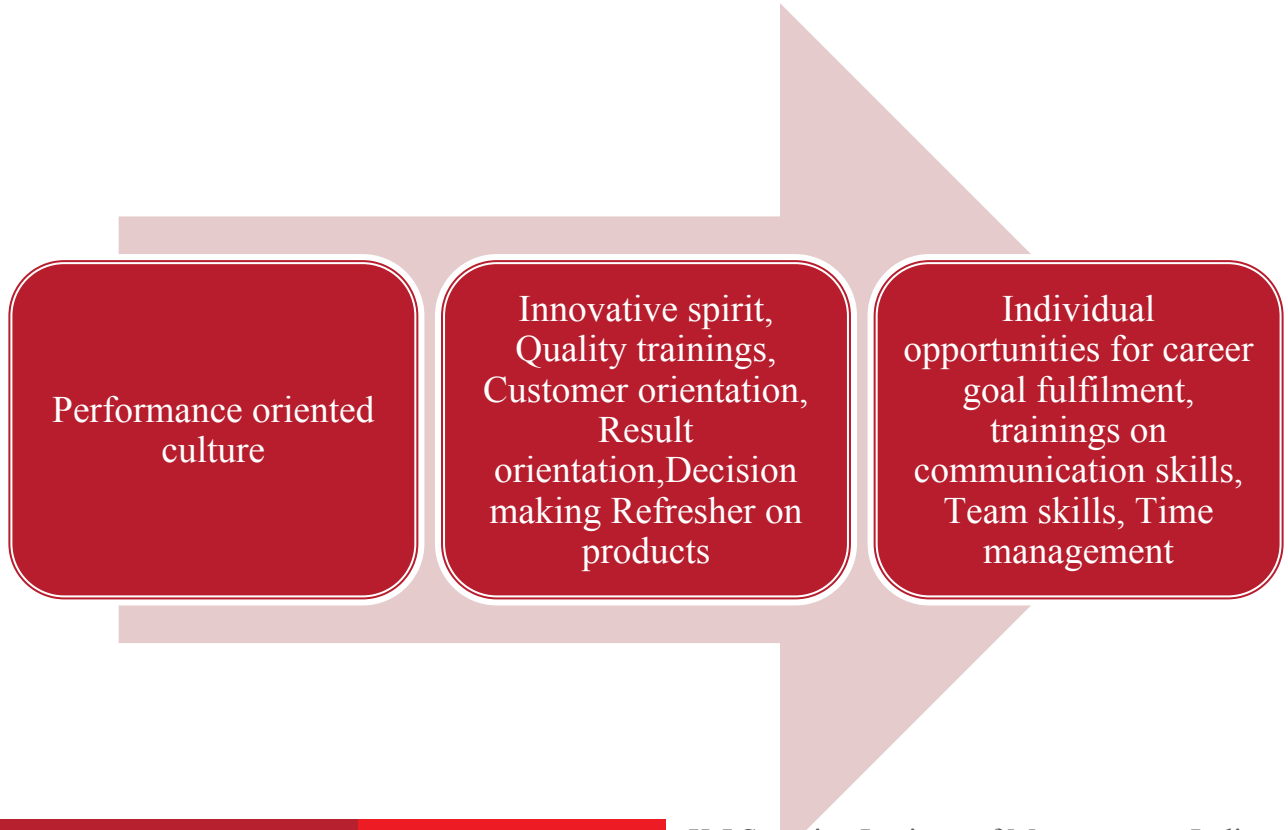
Report findings: Mr. Smith summarized his findings in a report that included:
- A description of the objectives, methods and sources of data collection and analysis
- A presentation of the results of data analysis such as charts, graphs and tables
- A prioritization of the training needs based on their impact on the business goals
- A recommendation of training interventions to address the training needs such as online courses, workshops, coaching, mentoring etc.

Training Need Analysis

Implement training: Mr. Smith implemented the training interventions based on his recommendations. He:
- Allocated a budget and resources for training
- Selected suitable trainers and vendors for training delivery
- Scheduled training sessions according to employee availability and work schedules
- Communicated training objectives, expectations and benefits to employees

Evaluate training: Mr. Smith evaluated the effectiveness of training interventions using various methods such as:
- Pre- and post-tests to measure changes in employee knowledge and skills
- Feedback forms to gather employee reactions and satisfaction with training
- Observation of employee behaviors and performance after training

- ABC Ltd has 2 options – Enter into mass manufacturing and build online presence or Continue with existing business model in an improvised way.
- If it continues , it has to build innovation, customer orientation, result orientation, team working, decision making, org commitment , process efficiencies , quality standards and improve working conditions and provide growth opportunities for all



Designing and Developing Training Program

Design means planning the overall training program. It includes:

Setting learning objectives
Creating a motivational learning environment
Make the learning meaningful
Make skills transfer obvious and easy
Reinforce the learning
Ensure transfer of learning on the job

Develop means assemble training content and materials and identify the most relevant training method to be used:

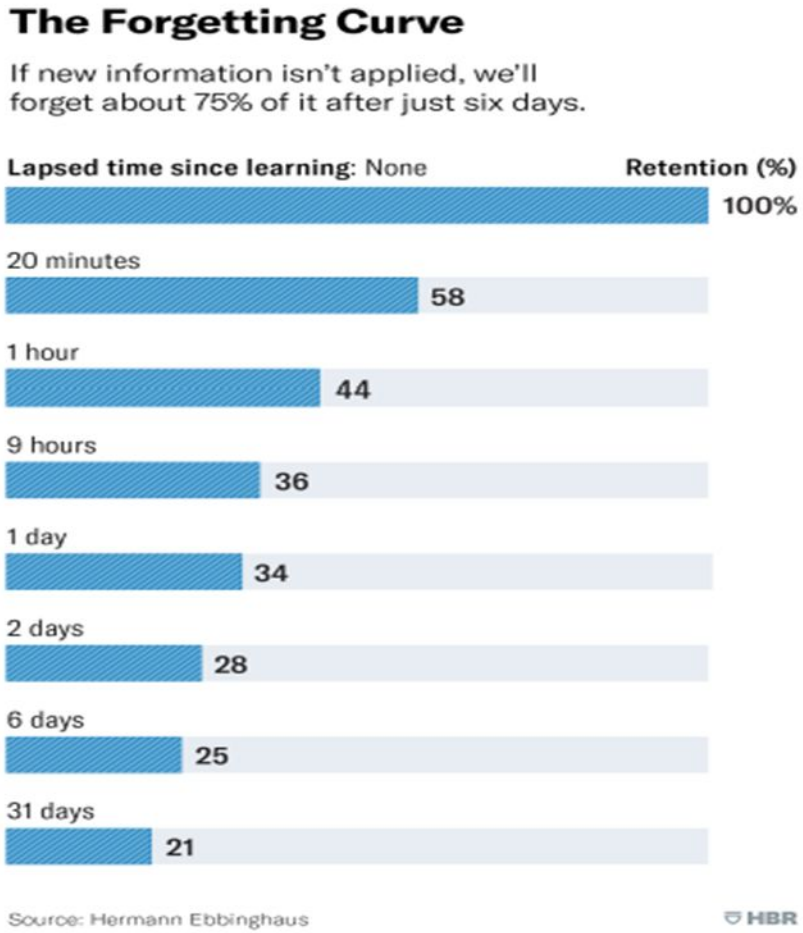
Lectures, PowerPoint slides , Web- and computer-based activities course activities, Trainer resources and manuals, Support materials, Audiovisual-based – DVD's , films, Vestibule Training – simulation, Electronic Performance Support System (EP SS), Videoconferencing, Computer-Based Training (CBT) , Simulated Learning and Gaming, Mobile , Micro learning, Virtual classroom, Learning portals

Training Techniqu

Categories	Training Techniques
On the job	Job instruction, job rotation, coaching and mentoring, quality circles. deputation, acting
Off the job	Classroom training, assignments, outbound programs, seminars, workshops
Self-paced training	Internet based training, self study
Individual-focused interventions	Counseling, coaching, mentoring
Group-focused interventions	Lectures, seminars, workshops
Trainer-controlled programs	Lectures, job instructions training
Trainee-controlled participants	Human process laboratories
Training participants together	Classroom
Training participants distributed	Video conferencing, webinars, conference calls
Presentation methods	Lectures, audiovisual methods
Hands-on methods	On-the-job training, self-directed training, apprenticeship, simulations, case studies, business games, role plays, behavior modeling, application planning
Group-building methods	Group building methods, adventure learning team training, action learning

Management Development Programs

- Management development
  - any attempt to improve managerial performance by imparting knowledge, changing attitudes, or increasing skills
- Strategy's role in management development
- Support succession planning process
- The 9-box grid
  - shows **potential** from low to medium to high on the vertical axis
  - shows **performance** from low to medium to high across the bottom
- Can simplify the task of choosing development candidates



The Forgetting Curve
If new information isn't applied, we'll forget about 75% of it after just six days.
